We would like to extend a special "Thank You" to all the parents who have supported PVIS Math Club throughout this year and, in many cases, for several years. We appreciate your cooperation and assistance. We have enjoyed working with this outstanding group of students and their awesome parents. We will especially miss this group of 8th graders who have made impressive progress during their time in PVIS Math Club. Persistence and correcting errors certainly paid off for this group of 8th graders. They were role models and set the standard for younger members.

This was certainly an unusual year. No one could have predicted what unfolded with COVID - 19. Things came to a halt just as we were preparing to finish our competitions, have our Teamwork Partner events in Math Club and prepare for Awards Night. We are following the advice of the administration in doing all interaction online and waiting to hand out trophies, certificates, medals and other "hardware" earned by students once it is safe. This document highlights the students' many accomplishments.
